Local Code: 01109450

What has been the best aspect of this course?

- The homework helped out a lot and helped me improve my writing skills.
- The best aspect of this course in my opinion, is the ability to choose our own topics when it came to writing our essays.
- Learning to write better
- The best aspect of this course had been the instructor, Dr. Cole because she has a lot of patience and never makes anyone feel dumb for asking what might be considered a dumb question.
- Nothing
- the best aspect of the course was the many helpful opportunities for help on essays, like workshops
- The best aspect of this course would be the use of the houses as a device to encourage the students to work harder.
- Writing papers based on opinions.
- The best aspect of this course was being able to improve on my writing skills and learn new things. The professor created an atmosphere that was comfortable and open. I enjoyed this class very much.
- Dr. Cole was really helpful and answered all of the questions I had.
- just learning more about the subject.
- Dr. Cole reminds me of a mix of Ms. Honey and Matilda from Matilda and that cheers me up.

Would you change anything about this course? If so, what would you change?

- No, I would not change a thing.
- This course or at least the instructor assigned hefty assignments and they were only worth 5 points. In my opinion assignments should be worth more.
- I would add more class time for essays.
- I would not change anything about this course because the way the assignments and lessons that were given in class were organized made the class less over whelming because it broke everything down.
- The homework assignments

Would you change anything about this course? If so, what would you change?

- the house system
- I wouldn't change anything about this course.
- Yes, I think that there should be less homework.
- If I were to change anything about the course, it would be the workload. It was a bit much, especially when considering that this is for 2+ semester students who have increased their average class difficulty significantly since the first semester. I don't think the content or the effectiveness of the work should change, just the amount. Also, don't provide more than a day of late work accepted. I found myself waiting for the last day I could possibly turn it in to complete the essay. Maybe if you only gave a day of late work instead of three, this won't effect future students as much as it did me.
- Yes, I would change the grading of the class in terms of the percentage that each assignment has on the overall grade.
- No Houses and less homework assignments
- no i think the way the class is taught is fine and helps overall.
- I wish things were graded differently so not as much weight lies on each major essay.

Comments: Use the space provided in the text area below for your comments.

- Very smart instructor but she is a very hard when it comes to grading assignments.
- I enjoyed the course
- I really learned a lot from this class. Dr. Cole really helped me improve my writing.
- Pretty good course taught by an excellent teacher.
- The class was an enjoyable class. It was fulfilling, expandable, and useful. I know that this class has and will ultimately help me the further I go along in college. I'm really glad I had the professor I got, and I only wished I had personally done better.
